Medang Indah 1, Blok CVI/B.19

My name is Dimas Adisaputra, and I am a fresh graduate with a degree in Information Systems from Multimedia Nusantara University, specializing in Full Stack Web Development. I have complementary skills in Mobile Application Development and Database Development that support my primary expertise.

I thrive in team environments and am passionate about learning new technologies and frameworks related to full stack web development. I excel at problem-solving and enjoy seeking out new experiences that can enhance my skills and knowledge in both frontend and backend development. My dedication to teamwork, coupled with my technical expertise in full stack development and eagerness to learn, enables me to contribute effectively to any project. I am always ready to face new challenges and provide innovative web solutions, making me a valuable asset in the realm of full stack web development and information technology.

Professional & Project Experiences

Advanced Inventory Management - UMKM Individual Project   Jan 2025 - Jul 2025
Fullstack Developer

- Built full-stack inventory management system with frontend UI and backend server architecture using HTML5, CSS3, JavaScript, Node.js, Express.js, and PostgreSQL.
- Implemented role-based access control (RBAC) and permission management for secure user authentication and authorization.
- Created interactive analytics dashboard with real-time data visualization and reporting tools for inventory tracking and business insights.
- Developed scalable web application architecture ensuring optimal performance and maintainability.

Ecommerce Website - Accent Wall Company   Sep 2024 - Dec 2024
Fullstack Developer

- Developed complete e-commerce platform for wood panel manufacturing company with responsive frontend and backend functionality using HTML5, CSS3, JavaScript, and Firebase.
- Designed product showcase system with detailed catalogs, image galleries, and interactive displays for accent wall product portfolio.
- Implemented Firebase database management for real-time data synchronization, product data handling, and user management.
- Created user-centered design prototypes using Figma for intuitive UI/UX before development implementation.

Company Landing Page - Payu Living Company   Sep 2024 - Dec 2024
Fullstack Developer

- Developed corporate landing page for Payu Living with responsive frontend and backend functionality using HTML5, CSS3, JavaScript, Bootstrap, and Firebase.
- Designed multi-brand information architecture to present subsidiary brands with cohesive navigation and brand representation.
- Showcased competitive advantages through strategic content placement, interactive elements, and visual presentations for brand awareness.
- Implemented scalable Firebase content management system for easy updates and maintenance of multi-brand information.

Pokemon Card - Personal Course   Jul 2024 - Aug 2024
Fullstack Developer

- Developing a simple display for a Pokémon card mobile application.
- The application showcases Pokémon cards with details like name, type, moves, weakness, and health points.
- JavaScript is used as the main programming language.
- React Native is employed as the framework for development.

Auctionin - Web Development Course   Aug 2021 - Dec 2021
Backend Developer

- Developing the backend and frontend of an Auction Website.
- Responsible for backend development of the login and registration pages.
- The website focuses on simplifying the buying and selling of new and used goods.
- Features include affordable starting prices and the option to bid higher for immediate purchase.
- The prototype was designed using Figma.
- HTML and CSS are used as the main languages for development.

Aganss Barbershop - Mobile Application Course   Aug 2022 - Dec 2022
Backend Developer

- Leading the development of both backend and frontend for a barbershop mobile application.
- The app stramlines customer experiences by simplifying product purchases and appointment bookings for haircuts and hairstyles.
- Utilizing Java as the core programming language.

- Integrating SQLlite and MySQL for efficient database management.
- Employing Object Oriented Progamming (OOP) principles throughout the development process.
- Designed the initial prototype using Figma to guide the development.

Merpati - Human Computer Interaction Course   Jan 2022 - May 2022
UI Designer

- Prototyping a Sexual Assault Mobile Application focused on protection against sexual violence.
- The prototype was designed using Figma.
- It also includes various informative articles to educate and empower users.
- The app features an alarm system for triggering emergency calls during incidents of sexual violence.
- Serving as the UI designer, creating an intuitive and user-friendly interface.

Ukost - Technopreneurship Course   Jan 2023 - May 2023
UI Designer

- Prototyping a website for Boarding House Online Booking.
- The system operates similarly to hotel booking platforms but is tailored for student accommodations.
- Features include searching for the nearest boarding houses to the desired university.
- The website is designed to facilitate student bookings for boarding houses.
- The prototype was designed using Figma.

Uteen - Information Systems Analysis and Design Course   Aug 2022 - Dec 2022
UI Designer

- prototyping an Order Food Mobile Application for the Multimedia Nusantara University Canteen.
- This app focuses on streamlining food ordering for students, aiming to save time and simplify virtual payments.
- Allows students to order food, schedule pick up times, and make payments digitally.
- The prototype was designed using Figma.

Education Level & Skills

Universitas Multimedia Nusantara - Tangerang, Jawa Barat   Aug 2021 - Aug 2025
Bachelor of Information System, 3.37/4.00

- Major : Information System, Specialization : Database Development

Organisational Experience

Teater Katak - Indonesia   Dec 2023 - Jul 2024
Head Field Coordinator

Teater Katak is a student theater group based at Universitas Multimedia Nusantara (UMN) in Indonesia. Established in 2009, Teater Katak is a Unit Kegiatan Mahasiswa (UKM) dedicated to performing arts, offering opportunities not just in acting, but also in music, makeup, design, documentation, funding, and more. This theater group has staged numerous productions both on-campus and at prominent cultural venues such as Gedung Kesenian Jakarta and Taman Ismail Marzuki .

- As the field coordinator, I handle the necessary tasks on-site, Providing logistical needs for sponsors on-site, Supplying the required items for the entire crew, and Arranging transportation and accommodation for the entire crew.

Skills & Other Experience

- **Programming Languages**: Javascript, Java, HTML, CSS
- **Frameworks & Libraries**: NodeJS, ExpressJS, ReactJS, React Native
- **Databases**: PostgreSQL, Firebase, MySQL
- **Tools**: Git, Github, Postman, Vite, Visual Studio Code, Android Studio, Figma, Tableu
- **Public Projects** ⊘: All of my project links
- **Soft Skills**: Time Management, Collaboration, Teamwork, Adaptability, Empathy, Creativity, Networking
- **Interest**: Website Development, Mobile Application Development, Database Development, and Data Visualization.
- **Language**: Bahasa Indonesia and English
